

mkr

**This carousel
was made
by AI...**

...but not the way you think.

mkcr

~~No Canva.~~

~~No drag & drop.~~

~~No UI.~~

Just a **terminal**
and three
commands.

mkcr

THE TOOL

~/projects

mkcr

Make Carousel

A CLI tool written in Go that turns HTML + Tailwind into PDFs.

Go

Open Source

Apache 2.0

Ludovico Russo • Swipe →

 bash

```
$ mkr init my-post
```

```
$ vim 1.html
```

```
$ mkr render my-post
```

```
✓ PDF generated → my-post.pdf
```

Three commands. Zero UI.
One PDF ready.

Why a CLI?

Because AI doesn't need
a graphical interface.

It needs **commands**.

mkcr

AI-NATIVE

1 Give a CLI tool to Claude

|

2 Describe the carousel you want

|

3 It generates HTML and runs mkcr

This carousel was generated exactly like this.

mkcr

OPEN SOURCE

Open source.
Apache 2.0.

→ github.com/ludusrusso/mkcr

Try it.

Star it.

Fork it.
